## Sai Top Airflow Quick Start Guide

Thank you for purchasing the Sai Top Airflow Atomizer! The Sai TAF is a fully customizable 22mm cannabis concentrate atomizer. Complete with both adjustable top and bottom airflow, as well as over 15 coil options.

### Sai Components

### Using Your Sai

- ⇒ Set your mod to the proper settings for the coil you're using
- ⇒ Load a small amount of concentrate into your coil, near the center
- ⇒ Inhale while pressing and holding the fire button

### Tips

- ⇒ Use a pulsing pattern when using wattage mode to prevent burning your product
- ⇒ Loading a small amount of concentrate will reduce reclaim
- ⇒ Store your Sai upright to prevent leaking
- ⇒ Lubricate O-rings with a food-grade oil

### Getting Started

- ⇒ Select a compatible sub-ohm capable 510-thread box mod
- ⇒ Ensure you know how to change the settings on your mod (temp, temp control, wattage)
- ⇒ Dry fire all new coils to burn off any residue

### Setting Up

- ⇒ Screw the Sai clockwise onto your mod
- ⇒ Adjust the bottom airflow by rotating the ring around the base of the atomizer
- ⇒ Adjust the top airflow, or block it off if not using a bucket coil, by rotating the ring around the cap of the atomizer

Coil	Wattage	Temp Control	Temp (F)
Ceramic Donut	8-15	Ni	320-420
Triple Titanium w/ Quartz	15-25	Ti	350-450
Triple Titanium w/ Black Ceramic	15-25	Ti	350-450
Dual Titanium	15-25	Ti	350-450
